

Facilities Management Solutions

Regulatory Compliance Mock Survey

In a landscape where the Environment of Care and Life Safety Chapters consistently rank among the top concerns in regulatory surveys, staying ahead is not just an option, but a necessity. FMS offers a strategic approach to ensure your healthcare facility isn't just compliant but leads in safety and preparedness.

What We Offer:

Targeted Review & Analysis: Through focused evaluation, we highlight areas needing attention, delivering comprehensive insights for improvement.

Expert Recommendations: Leveraging our subject matter expertise, we provide actionable advice and best practices tailored to your facility's unique needs.

Real-World Simulation: Our mock surveys mirror actual accrediting agency processes, testing your hospital's readiness for unannounced surveys and enhancing confidence in your response capabilities.

Our Process:

- **Detailed Standards Inspection:**
 - Safety, Security, HazMat
 - Fire Safety, Medical Equipment
 - Utilities Management
 - Life Safety
 - Emergency Management
- **Collaborative Reviews**
- **On-Site Mock Surveys**
- **Seamless Coordination**

What does a Mock Survey Include?

- In-depth discussions on facility layout, square footage, and specific areas of concern
- **Standards and Plans Review:**
 - Environment of Care/Physical Environment plans
 - Annual Evaluations and Hazardous Materials and Waste procedures
 - NFPA 101-2012 Life Safety Code requirements, including life safety drawings
 - Infection Control policies regarding construction/renovation.
 - Fire Response Plan, including drill reviews and critiques
 - Fire Alarm and Fire Suppression Testing Compliance
 - Utility System and Medical Equipment maintenance procedures
 - Emergency Power Systems documentation
- Review of Emergency Management HVA, Emergency Operations Plan, and Disaster Drills critique
- Comprehensive Building Tour
